

Centre for Modeling and Simulation

... because all models are false and some are useful ...

January 21, 2017

... I was impressed to hear that this Centre was started in the early 2000s, when such places were still rare even in the U.S., and to see the multi-disciplinary projects that take place there. I hope that this Centre continues to thrive ...

– Dr. Rebecca McNamee (GIAN Faculty) to Hon'ble Vice Chancellor, 2016

CMS in a Nutshell

MTech (M&S)

Academics

Unique Curriculum

Consultancy

M&S for Defence

Fastest Supercomputer
(State Universities)

Computing

Atoms to Astronomy

Research

Established in 2003 through UPE seed funding from UGC, to

promote modeling and simulation methodologies

encourage and support truly multi-disciplinary, problem-centric
approaches to basic and applied research

transcend traditional boundaries separating knowledge disciplines

Details (p.29) | A Cartoon Guide to M&S (p.51)

- Director (Additional Charge)
- Associate Professor: 1 (Contract)
- Assistant Professors: 3 (1 UGC FRP, 2 Contract)
- Postdoctoral Fellows: 4 (2 DS Kothari, 2 DST NanoMission)
- Academic/Placement Coordinator: 1
- Administrative & Technical: 5

[Details \(p.31\)](#) | [Awards & Recognitions \(p.32\)](#) | [Visiting Faculty \(p.33\)](#)

Highlight: High-Performance Computing

- **Sahasrar**: 1000+ Intel cores, 50 nodes

(Possibly) fastest+largest amongst state universities

- **Ashtanga**: ~100 Intel cores, 8 nodes
- Other smaller-scale computing clusters

Sahasrar
Computing Facility
for
DST Funded
Research in Materials
Science

What is HPC? (p.35)

Computing

- 3 labs for students ~ 100 computers
- 2 research laboratories
- Self-maintained servers:
Local cloud, web, mail, NAS, ...
- Large collection of open-source and special-purpose software
- Network storage, personal web space
- 24x7 access to premises
- 24x7 internet & WiFi (courtesy of SPPU)
- Moodle@CMS: For course management

Moodle@CMS – <http://apps.cms.unipune.ac.in/moodle/>

Library

- ~ 3000 books
- Magazines & journals
- Online resources
- Spacious reading hall

Building

- Currently, ~ 10,000 sq.ft.
- Floor 1 construction in progress for School of Scientific Computing

Getting there ...

8 Funded Research & Consultancy Projects ~ Rs 10.65Cr (2011–)

Defence: Weapons Ballistics
Industrial Modeling
Computational Materials Science

Computational/Systems Biology
Grid Computing

DST (Rs 9.19Cr)
DBT (Rs 1.1Cr)
DRDO (Rs 10L)
UGC (Rs 6L)

European Commission (EUR 39K)
SPPU + PennState (US\$ 13K)
SPPU (Rs 2.75L)
Private Industry (Rs 50K)

Funding Details (p.37) | Research Groups (p.38)

Research/Consultancy Highlights

Predicting Target Accuracy Using M&S:
Field Trials are Expensive  (p.11)

Complex Magnetic Structures in Alloys:
Important for Technology (p.39)

Statistical Science: From Genomes to
Universe (p.40)

Materials for Energy Applications:
Critical for Survival (p.41) 10

Research/Consultancy Highlight: Sukratu Barve

CFD Analysis of 120mm FSAPDS Tank

Ammunition: ARDE–DRDO MBT Group,
2013–16. Project Cost: Rs 80,00,000

Understanding interior, intermediate, and exterior ballistics of tank ammunition.

- Setting up mathematical models and carrying out simulations.
- Designing, implementing, testing, and delivering a customized open-source software package for the above.

Modeling the Action of a Thermact: Abhitech Energycon Ltd (Mumbai), 2010–11. Project Cost: Rs 50,000

Understanding how combustion-enhancing additives in coal-fired furnaces help maximize yield.

Predicting target accuracy using M&S: Field trials are expensive!

Individual Research Collaborations Involving CMS Faculty

Visualization based on co-author affiliations

[Details \(p.43\)](#)

Flagship Programme

- MTech Programme in Modeling & Simulation

Details (p.44)

For Sponsored Students (Industry, Institutes)

- MTech Programme in Modeling & Simulation (Part Paper, Part Research)

<http://cms.unipune.ernet.in/reports/pd-20160527/>

Certificate Courses

- Fundamentals of Corporate Computing (Recently Approved)
- Linux Basics, L^AT_EX, etc.

PhD and MPhil

- CMS faculty are recognized guides for PhD/MPhil in Physics and Scientific Computing (Multidisciplinary!)

One of its kind in India – A pioneering initiative

Very few similar broad-based programmes around the globe

Details (p.44)

<http://cms.unipune.ernet.in/reports/pd-20160121/>

Applied mathematics + applied statistics + computing + M&S

2-Year, Post-BE/BTech

Core courses + choice-based credit courses + internship

Multidisciplinary, focused on methodologies

Relevant to academics *and* industry

Meticulous exposition of our philosophy of M&S,
pedagogy/didactics, and education in general

Course and learning management with Moodle@CMS

Details (p.44)

Curriculum Design

- Stakeholder involvement: industry experts, academicians, alumni
- Compliant with UGC's guidelines for choice-based credit system
- Delicate balance between
 - theoretical, applied, & hands-on
 - career possibilities: academic, corporate/industrial
 - fundamental knowledge & latest in technology
- Careful time-budgeting of student's work hours
- Addressing student weaknesses
 - self-study, learn-unlearn-relearn
 - time and stress management
 - out-of-box thinking
 - communication and presentation

[Administrative Summary \(p.45\)](#) | [Curriculum Outline \(p.46\)](#) | [Implementation \(p.47\)](#)
[Enrichment Activities \(p.48\)](#) | [Enrollment & Performance \(p.49\)](#) | [Student Support \(p.50\)](#)

Learning Outcome

- **100%** students are employed within months of passing
- Recruitment via referred placements and project internship
- Equipped with fundamental knowledge + latest in computing technology, students choose both industry & academic careers
- Popular internship & career fields
 - Computational fluid dynamics (CFD)
 - Computer-assisted engineering (CAE)
 - Operations research (OR)
 - Data science and machine learning

Popular internship areas
(p.20)

Representative placements
(p.21)

CMS was proud host to 2 GIAN courses (November 2016)

Functional Neuroimaging (Dr. Rebecca McNamee, US)

Fracture Mechanics (Prof. John Landes, US)

Other Enrichment Activities (p.48)

Popular Student Internship Areas

Machine Learning

Computational
fluid dynamics

Operations Research

Atmospheric Modeling

Digital signal processing

Control Systems

Representative Placements: Industry & Academics

Tech
Mahindra

SIEMENS

Neilsoft

MPI, Germany

GMU, USA

INP Grenoble, France

Empa, Switzerland

KAUST, Saudi Arabia

HBCSE, Mumbai

IIT Bombay, Mumbai

IISER, Pune

CMS student teams have ranked within top 5-10% in

international crowd-sourced data science competitions

Mentor: Prof. V.K. Jayaraman, Adjunct Emeritus Professor

... CMS has been running one of the best programs in modeling and simulation that I have ever come across. The vision, the comprehensive approach in both theoretical as well as applied aspects, the very careful nurturing of students, strong links with industry & high-quality research that is carried out by faculty [...] deserve all the encouragement & support that can be provided ...

– Prof. N.V. Joshi (IISc) to Hon'ble Vice Chancellor, 2009

Strengths

- Curricula: Rigorous, yet employment-friendly
- Team: Dynamic & dedicated, multidisciplinary to the hilt
- Uncompromising on academic values, yet supportive of weaker elements
- Driven to excel, despite the system

Weaknesses

- Programmes need to be publicized (aka “marketed”)

Opportunities

- Potential for diversification
- M&S: Relevant to industry & academics
- M&S: Relevant nationally & internationally

Challenges

- Funds, survival, stability
- Long-term faculty positions, critical faculty mass
- Lack of public-sector awareness about M&S, CMS, and MTech@CMS
- AICTE recognition:
University-level effort under way
- Volatile national education policies:
Not conducive to multidisciplinary programmes

Thank You

The Acid Test: What Students Say About CMS

Yes! I got very good salary hike while switching to new company, thanks to CMS.

Satadru Bera (2013-15). Senior Analyst in Vehicle Crash Simulation Field.

Yes, CMS experience helped ... furthering my career.

Nitin Katakoud (2008-10). ICERTIS-Microsoft – Best Team Member Award.

... expertise in the R language, unix scripting, high-performance computing, and mathematical modeling and simulation, which I learnt at CMS only.

Sagar Kashid (2008-10). Support Scientist, Climate Modeling Group, CDAC, Pune.

MTech ... a perfect blend of theoretical knowledge and applied engineering.

Jitender Yadav (2008-10). Avionics Systems Engineer at Honeywell International.

The curriculum is one of a kind ... culture at CMS is very simply “for the students”

Anirudh Jonnalagadda (2014-16). Pursuing PhD at IIT-B.

From biology background ... I could shift easily to computational biology due to CMS

Rashmi Kulkarni (2008-10). Completed PhD at IISER, Pune.

My tenure at CMS ... opened up many interesting possibilities ...

Sarvesh Nikumbh (2010-12). Pursuing PhD at MPI-INF, Germany.

Additional Information: Vision

Established in 2003 through generous seed funding (UGC/UPE), to

- promote, support, and facilitate academics and research in **mathematical modeling and computational simulation**;
- promote use of **computation as the third scientific methodology**;
- promote **highly multidisciplinary** approaches that transcend (artificial) boundaries separating traditional knowledge domains;
- promote a **problem-centric outlook** for real-life scientific and technological problems;
- nurture **strong expertise in state-of-the-art computing** technologies;
- nurture **computing culture** on the University campus.

Additional Information: Infrastructure

High-Performance Computing Clusters

Connecting together several small computing units through fast interconnects, HPC makes it possible to solve large & daunting mathematical and computational tasks.

HPC is used in virtually all domains of advance research; e.g., materials science, atmospheric science, astrophysics, chemistry, computer aided engineering, etc.

Sahasrar@CMS has 1000+ computing units (cores) on 50 nodes connected together to performs 50×10^{12} mathematical operations in just one second!

The Spirit of Scientific/Mathematical Modeling

Picasso

Back (p.4)

The Spirit of Scientific/Mathematical Modeling

- Abstraction: Keep only the essential in the context of the question being investigated
- Express relationships in the language of mathematics; this is the model
- Explore model through simulation/computation
- Validate model against reality; modify it if required
- ...

Back (p.4)

LIBERAL-ARTS MAJORS MAY BE ANNOYING SOMETIMES, BUT THERE'S *NOTHING* MORE OBNOXIOUS THAN A PHYSICIST FIRST ENCOUNTERING A NEW SUBJECT.

The Spirit of Scientific/Mathematical Modeling

WHEN PEOPLE ASK FOR STEP-BY-STEP DIRECTIONS, I WORRY THAT THERE WILL BE TOO MANY STEPS TO REMEMBER, SO I TRY TO PUT THEM IN MINIMAL FORM.

Principle of Parsimony

aka

Occam's Razor

...

The fact that the polynomial is an approximation does not necessarily detract from its usefulness because **all models are approximations**.

Essentially,

all models are wrong, but some are useful.

However, the approximate nature of the model must always be borne in mind.

...

George E. P. Box

Empirical Model-Building and Response Surfaces (1987, p 424)
